Garage doors for commercial and industrial premises.

ABOUT A1 GARAGE DOORS

A1 Garage Doors brings over 20 years' experience and expertise to the commercial garage door sector. In that time, we have earned a reputation for reliability, efficiency, and superior craftsmanship.

We are a family-run business whose aim is to supply superior garage door products, services and advice at affordable prices to commercial businesses of all sizes and types. From heavy-duty industrial doors to lighter, more stylish and modern designs, our extensive commercial garage door range will include an option to suit your business

Our clients include retail, warehouses, transitional facilities, cool-stores, carparks and factories where we work to provide customised door solutions to ensure optimal performance and security.

Within our workshop we focus on developing skilled and knowledgeable staff who are friendly, reliable and hardworking. Outside of the workshop we are focused on customer satisfaction through delivering a superior garage door installations and repairs.

Company Values

We adhere to company values which characterise every aspect of our business:

- **A passion for what we do** – we know about garage doors and are passionate about sharing our knowledge to provide our customers with the best garage door solution for their unique setting
- **Customer focused** – we often say, "We're not a garage door company; we are a customer service company who sells garage doors." In other words, the needs of each customer come first and are our prime focus
- **The best solution for you** – first we listen to the needs of our customers, then we provide a number of solutions coupled with advice about the one that best suits their situation and budget
- **Choice is important** – it's important to us that our customers understand all the options before making a final decision. That's why we have an extensive range of sectional, roller and tilt garage doors in a variety of textures and colours
- **Honesty, reliability and integrity** – these are the hallmarks of our service. We are quick to respond, honest in what we can deliver, and reliable in terms of quality and meeting your deadlines

- Are mobile – we come to you.
- Offer a flexible afterhours service if required

CONTINOUS ROLLER DOORS

Continuous Roller Doors, also known as rolling steel doors, are a space-efficient solution for businesses wanting a commercial door that is both secure and reliable at a great price. Engineered for durability and ease of operation, continuous roller doors are familiar outside retail shops and commercial businesses throughout New Zealand.

Constructed from high-quality 0.55BMT colour steel or Zincalume, the continuous curtain is a high quality look at a great price point. This makes it an ideal choice for shops and facilities on a budget.

Available in a range of colours and customised sizes continuous roller doors combine the need for both security and practicality.

Common uses:

- Exterior shop fronts
- Warehouses
- Industrial facilities (factories)
- Security doors over retail spaces
- Any commercial business requiring security coupled with ease of use

Features

- Available in Colourstеel or Zincalume
- Motor, hand chain, or manually lifted (subject to door size)
- The ideal door for smaller budgets
- Can be applied to a wide range of applications
- Flashing to surround door portal can be supplied as required

0.55 Colourstеel or Zincalume

0.87 - 5.1m wide
1.8 - 4.5mm high

ROLLER SHUTTER DOORS

Engineered for durability, security, and ease of use, Roller Shutter Doors are constructed from high-quality steel or aluminium and feature a series of horizontal slats that are hinged together. This design allows the door to roll up and down smoothly, providing efficient and space-saving access.

One of the primary advantages of Roller Shutter Doors lies in their adaptability to diverse environments. Commonly used in warehouses, retail spaces, carpark gates and industrial facilities, these doors can be manufactured in various materials and in a variety of finishes and sizes to match your business's unique needs, ensuring a seamless integration into existing architecture.

Slat

Created from horizontal, interlocking, steel or aluminium slats, Slat-style Roller Shutter Doors are perfect for heavy industrial situations. The interlocking slats make provides superior strength to added security and, in the event of damage, individual slats can be swapped out (no need to replace the entire door).

Common Uses

- Factories
- Warehouses
- Carparks
- Situations requiring high security

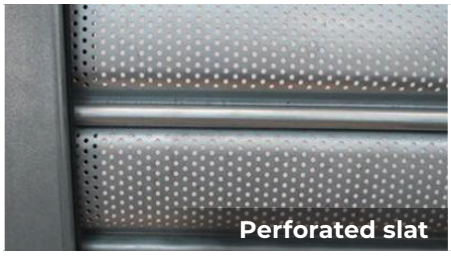

Features

- Ideal for heavy industrial doors where superior security is required
- Motor, hand chain, or manually lifted (subject to door size)
- Doors are spring balanced for ease of use
- Flashing to surround door portal can be supplied as required

0.75 BMT galvanised steel with an option to powdercoat to any colour. Also available in aluminium

1 - 9m wide
Up to 6m high

Standard slat

Perforated slat

80mm x 20mm vented slat

Grill

Grill Slat Roller Shutter Garage Doors have a wide range of uses but are most familiar leading into carparks that require plenty of airflow, or as security grills in interior retail stores, e.g., inside a shopping mall, where both security and vision are important. The doors are constructed from rounded aluminium rods linked together to create a stylish but secure doorway.

Common Uses

- Interior shop fronts
- Shopping malls
- Carparks

Features

- Motor, hand chain, or manually lifted (subject to door size)
- Doors are spring balanced for ease of use
- Flashing to surround door portal can be supplied as required

Available in two aluminium rod sizes = 12mm or 19mm diameter.
Available in Zincalume or powdercoated.

Door width for 12mm = 1.2m to 6.5m
Door width for 19mm = 6.0m to 10m

Carpark entry/exit

SECURITY SECTIONAL DOORS

Security Sectional Commercial Garage Doors combine the speed and reliability of a residential section garage door with the industrial strength of a commercial garage door.

The sectional construction consists of individual panels that interlock to provide a the strongest barrier on the market to combat unauthorized access, burglaries, and adverse weather.

Fully custom-designed and manufactured for each unique situation, these doors allow for quick and convenient access for vehicles and personnel.

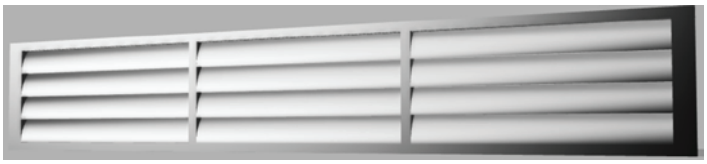

Common Uses

» Fully customisable these doors are most commonly used for carpark buildings where high security, ventilation, and privacy are a must

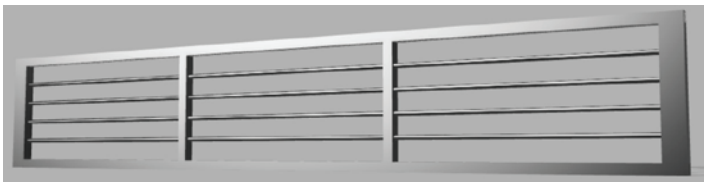

Our Security Sectional Garage Doors come in three ventilated door options

2mm Aluminium panels - inside aluminium frame

Airfoil Aluminium panels - inside aluminium frame

Aluminium tube - inside aluminium frame

Features

» Fast opening – ideal for garaging
» Durability – suitable for high cycle usage
» Security features may include reinforced hinges, tamper-resistant locking mechanisms, and advanced access control systems such as mobile phone control options
» Flashing to surround door portal can be supplied as required

Available in powder coated aluminium or anodised aluminium

Maximum door width = 6.0m (larger sizes POA)

Easily serviceable

HIGH SPEED SPIRAL DOOR

Fast-Moving Commercial Garage Doors (or High Speed Spiral Doors) are designed to open and close quickly. They can be operated automatically using a light curtain or proximity sensors.

Designed to optimise workflow and minimise downtime, Fast-Moving Doors are essential for businesses requiring maximum efficiency and productivity through the seamless entry and exit of vehicles and personnel, e.g., forklifts.

The rapid opening and closing contributes to energy efficiency and pest control by minimising the open time between indoor and outdoor environments. This makes them perfect for coolstores and food manufacture or logistics facilities.

Constructed from either wrapped steel or aluminium with a foam urethane core, the doors are fully insulated and are available with a clear or tinted window for added safety.

Common Uses

- Transitional areas within factories
- Coolstores and food manufacture or storage facilities
- Warehouses and logistics hubs
- Areas with constant forklift and personnel traffic
- Domestic carparks

Features

- Fast and quiet operation
- High usage - up to 100,000 cycles annually
- Exceptional noise and thermal insulation
- Fully weatherproof with high (Class 3) wind resistance
- Effective sealing performance
- Vision window available (clear or tinted)

Available in powdercoated wrapped steel or aluminium with a foam urethane core for superior noise and thermal insulation.

Maximum door width = 6.0m
Maximum door height = 6.0m

Maximum speeds = 2.1m/s opening and 1.0m/s closing

Optional light curtain or proximity sensors

Integrated with ground loops and fire security for extra safety

SHOP FRONT DOORS

Manufactured from durable polycarbonate, our Shop Front Doors are the ideal choice for businesses aiming to create an inviting storefront with a focus on safety and visual appeal.

Renowned for its strength, polycarbonate is impact resistant and transparent. The clear or tinted polycarbonate panels provide an attractive business entranceway, allowing natural light to illuminate the interior while showcasing products or services. Difficult to break or shatter, polycarbonate provides superior security which is supplemented by the addition of advanced locking systems for added protection.

The lightweight construction of these doors enables smooth and effortless operation.

The slat construction comes in two basic styles

- Horizontal – can be motorised; ideal for larger doors
- Vertical – manually operated

Common Uses

- Shops and businesses located internally, usually in a shopping mall

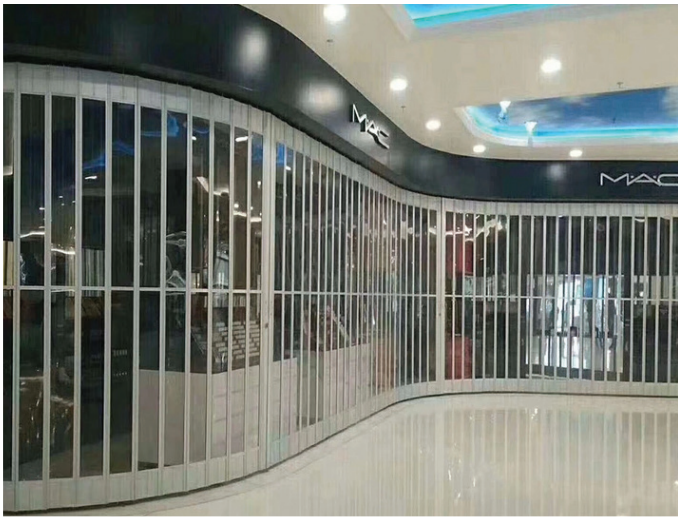

Constructed from clear or tinted polycarbonate slats with alternating aluminium joining rails.

Maximum door width = 6m
Maximum door height = 3.5m

Features

- Tough and durable polycarbonate construction
- Available in horizontal or vertical slat construction
- Motorised (Horizontal Doors)

MOTORS + ACCESSORIES

Commercial Garage Door Motors, or Openers, provide convenience and security for your commercial business or carpark. Electrically operated, users can effortlessly open and close doors with a remote control.

Motors supplied by A1 Garage Doors are equipped with safety features such as sensors that detect obstacles, and manual override in case of power outage. Smart technology can be integrated for remote monitoring and control.

We supply, install and maintain a wide variety of garage door motors including chain, belt, and screw-driven systems. The size and type of motor we recommend for your garage door will be determined by the weight, dimensions and situation of your specific door requirements. Motors are rated for high-duty and ensure accurate and reliable door travel.

Features

- Are rated for high-duty and ensure accurate and reliable door travel
- Come with a 2-year warranty or 10,000 operations (whichever comes first)
- Can be plugged into your existing access control
- For commercial garage doors come with infra-red safety beam as a minimum safety feature
